Wenatchee, WA 98801

Dear Mr. Jaquish:

**RE: Notice of Temporary State Waste Discharge Permit No. ST-9255
for Pearrygin Lake State Park, Effective May 28, 2005**

Your application for State Waste Discharge Permit No. ST-9255 for Pearrygin Lake State Park, was received by this office on March 11, 2005. It was reviewed and accepted as complete on March 31, 2005.

A Public Notice of Application was published on April 20, and April 27, 2005, in the Methow Valley News and the public comment period ended May 27, 2005, with no comments being received.

Given our limited resources, we are unable to process your application at this time. RCW 90.48.200 states, "In the event of failure of the Department to act upon an application within sixty days after it has been filed, the applicant shall be deemed to have a temporary permit. Said permit shall authorize the applicant to discharge waste into waters of the State as requested in its application only until such time as the Department shall have taken action upon said application."

Therefore, as RCW 90.48.200 and WAC 173-216-090 provide, your new Temporary Permit becomes effective **May 28, 2005**, the day following completion of the public notice comment period. It will remain in force for up to five years or until further notice by the Department, whichever occurs first. The Department will undertake writing a full permit as time allows. At that time we will contact you to discuss any changes in operation and to do a site visit.

Your temporary permit consists of the permit application and all appendices submitted with it. Compliance with the application and the appendices will constitute compliance with the temporary permit. We are including a copy of the previous permit issued to this

site under Derry's Resort. Following the monitoring and reporting in this permit will suffice until we get the new permit written. Staff plans to begin writing the new permit sometime this summer.

This authorization does not allow you to discharge pollutants not specified in your application and attachments or in quantities exceeding those specified in your application or appendices, or in quantities exceeding those specified. You are also required to comply with all water pollution laws and regulations. A new application is required in five years.

Under the Model Toxics Control Act, codified as RCW 90.48.465, Ecology is required to recover the cost of the Water Quality Permit Program. Ecology has adopted a regulation (Chapter 173-224 WAC) establishing annual permit fees for all municipal/ domestic and industrial wastewater discharge permit holders. Your Temporary Permit is subject to this fee.

Your permit fee is subject to the fee schedule in Chapter 173-224 WAC, Fee category: Privately Owned/State Owned Domestic Wastewater; Subcategory: c. .05-<.008 mgd. The year 2006 fee is \$1,373.00. Permit fee billing will be in a separate mailing from the Ecology Fee Unit.

If you have any questions or need assistance, please feel free to contact Dave Holland, your permit manager at 509/575-2434.

Sincerely,

G. Thomas Tebb, L.E.G.
Section Manager
Water Quality Program
